61 MP resolution

Unique form factor

Easy integration supported by Sony SDK

Sony presents a new interchangeable lens professional camera with approximately 61 megapixels and 35 mm full-frame image sensor. With its extremely high resolution and ultra-lightweight within a compact body, it is designed for industrial applications such as **UAV (surveying and mapping), photogrammetry, surveillance and inspection.**

Dimensions

Key industrial applications

High resolution sensor for detailed images and efficient coverage

High resolution, low noise and wide dynamic range images enable to reveal fine details like small scratches and cracks on a still image or short video.

With its 3fps continuous shooting capabilities and a higher burst capture rate, it allows for quick completion of shooting from high altitudes in a short amount of time. Additionally, the ISO range of 100-32000 gives the camera the ability to operate in most daylight conditions.

Exmor R
CMOS Sensor

Exmor R™ CMOS sensor

Sony's new Back-illuminated image sensor provides a high resolution of 61 MP.

BIONZ XR image processing engine

The latest advanced BIONZ XR™ processing engine from Sony produces, in real-time, natural gradations and realistic colours for amazing images.

Lightweight and compact design

The camera is designed to be the smallest and lightest interchangeable lens camera with a 35mm full-frame image sensor in Sony's α camera history. It measures 100.0 x 74.0 x 42.5 mm and weighs 243g (body only).

Created for industrial applications, the ILX-LR1 doesn't have a conventional camera body with the removal of the LCD monitor, viewfinder, image stabiliser, grip, Multi Interface (MI) Shoe or battery-driver functionality.

Large choice of E-mount lenses

Compatibility with a wide range of E-mount lenses enables the selection of the most appropriate lens. A single picture taken from high altitude can replace several pictures from a lower resolution camera.

Designed for easy integration with industrial applications

SURVEYING, MAPPING, INVESTIGATION

Long duration shooting

DC 10-18V power connection to external power supply devices and systems, for extended operation times without having to change batteries.

Control terminal

Low-latency signal available for remote applications requiring instant response, such as synchronisation with an external event, flash or, triggering multiple cameras.

Easy integration

The compact camera has screw holes for secure mounting, in any suitable location, on its six sides. The controls, connectors, micro-HDMI and USB-C ports are grouped together at the rear of the camera for easy installation.

PHOTOGRAMMETRY, PRODUCT IMAGE, INSPECTION

Remote operability

Sony Camera Remote SDK gives remote users access to the camera's menus and other functions from their own software applications. By integrating an API into the system, it becomes possible to control the camera from a computer, allowing changes to camera settings, shutter release, live view monitoring, and more.

Multiple interfaces

High flexibility of transmission through USB C connection or long standard Ethernet cable. Terminals are also lockable (except for HDMI).

- *1 Number of effective pixels varies depending on attached lenses and camera settings.
*2 There would be no sound due to no audio input on camera.
*3 HDMI RAW output requires configuration through the Camera Remote SDK application.
*4 Anti-flicker Shooting is not available when the [Shutter Type] setting is set to [Electronic Shutter].
*5 Varies according to shooting conditions or memory card used.
*7 (Configuration method/Access method) WPS or manually /infrastructure mode. When connecting to smartphones, the camera can always work as a base without a wireless access point. (Security: WEP/WPA-PSK/WPA2-PSK/WPA3-SAE)
*8 Models sold in some countries/regions support IEEE 802.11b/g/n (2.4GHz) wireless LAN only.
*9 HDMI output automatically detect connected device resolution.
*10 Sony accessories for the Accessory Shoe can be attached.
*11 A commercially available USB-LAN conversion adapter is required.
*12 When [Resolution] is set to [HD(720p)], [MJPEG] is only available.
